

Missouri Weekly Influenza Surveillance Report 2021-2022 Influenza Season¹

Week 5: January 30, 2022 – February 5, 2022

All data are preliminary and may change as more reports are received.

Summary:

- The estimated influenza activity in Missouri is Widespread².
- During Week 5, a total of 970 laboratory-positive³ influenza cases (885 influenza A, 80 influenza B and 5 untyped) were reported. A season-to-date total of 19,661 laboratory-positive influenza cases (17,524 influenza A, 1,998 influenza B, and 139 untyped) have been reported in Missouri as of Week 5. The influenza type for reported season-to-date cases includes 89.1% influenza A, 10.2% influenza B, and 0.7% untyped. The percentage of respiratory specimens testing positive for influenza in Missouri laboratories reporting to the National Respiratory and Enteric Virus Surveillance System (NREVSS) decreased to 2.56% during Week 5, with the most common subtype being A(H3N2) (Figure 5).
- Influenza-like illness (ILI) activity for Week 5 was above baseline for the hospital emergency room visit chief complaint data reported through ESSENCE. The reported percentage of visits for ILI through ESSENCE was 2.57% (Figure 6).⁴
- Fifteen influenza-associated deaths have been reported in Missouri as of Week 5.⁵
- Four influenza or ILI-associated outbreaks have been reported in Missouri as of Week 5.
- National influenza surveillance information is prepared by CDC and is included in the weekly FluView report, which is available online at <http://www.cdc.gov/flu/weekly/fluactivitysurv.htm>.

¹The 2021- 2022 influenza season begins CDC Week 40 (week ending October 9, 2021) and ends CDC Week 39 (week ending October 1, 2022).

²Widespread is defined as: Increased influenza-like illness from sentinel providers (ILI) in three or more regions and large numbers of laboratory-confirmed influenza cases in those regions.

³Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

⁴ILI is defined by ESSENCE as Emergency Department chief complaints for Influenza or (FeverPlus and (Cough or SoreThroat) and not NonILIFevers).

⁵All influenza-associated deaths became reportable in Missouri in 2016.
